To,

Aaryaman Aggarwal
Indian Institute of Technology (IIT) Kanpur

IUSSTF

IUSSTF/ IUSSTF-Viterbi Program/ 2025-26 **6 March 2026**

Dear Aaryaman Aggarwal,

Congratulations on your selection for the **IUSSTF-Viterbi (Summer Research Placement) Program** at the **University of Southern California (USC)**. This initiative is a collaborative partnership between the **Indo-US Science and Technology Forum (IUSSTF)** and the **USC Viterbi School of Engineering**.

The **IUSSTF-Viterbi program is a full-time research experience** designed to provide top Indian students with access to world-class facilities and directed research opportunities. By placing students under the mentorship of USC faculty, the program aims to strengthen technical expertise in engineering and technology, encourage future research careers, and foster long-term R&D collaborations between the Indian and American scientific communities.

The program is tentatively scheduled to take place from **May 24, 2026, to July 19, 2026** (excluding travel time) at the Viterbi School of Engineering, USC, under the mentorship of **Dr. Evi Micha**.

The program will cover the following:

1. **Return Air-ticket:** IUSSTF will provide round-trip travel funds, coordinated through their travel desk via the shortest economy class route.
2. **Stipend:** A stipend of US$ 2,500 will be given by IUSSTF before your departure from India for meals and living expenses.
3. **Accommodation & Health Insurance:** USC will arrange and cover on-campus housing, health insurance, and access to the health center during the program.

If you require further information regarding your award, please contact my colleague Ms. Priya Thomas at viterbi-india@iusstf.org or pthomas@iusstf.org.

We hope this program will be a valuable and rewarding experience for you!

Sincerely,

Chaitali
